- Visual Programming Cues
 - Key status, key tooltips, memory meter, device wizards
- PCF/CCF - Converts all graphics, navigation, and audio items

>> **Exceptional Technical Support**

>> **Extensive Training Offering**

>> **Profitable Dealer Programs**

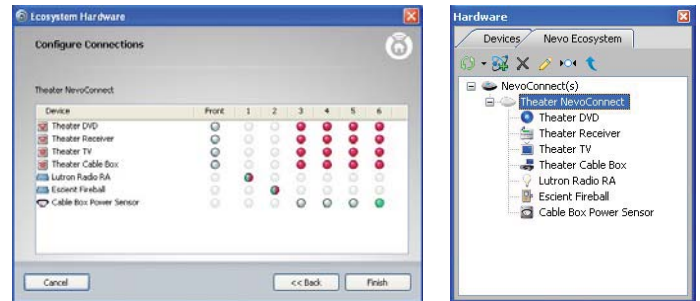

NEVO®
by Universal Electronics

NevoStudio Pro allows installers to completely customize Nevo controllers using a powerful and flexible programming suite.

Features

- Wizards enable you to easily add or edit devices and automatically create control interfaces.
- Extremely intuitive interface includes drag and drop use of device commands, backgrounds, buttons, symbols, themes and even entire devices.
- Program all Nevo Controllers and NevoConnects for a particular installation in one Job file.
- Automatic image resizing so you can use your customer's vacation pictures on their interface without needing to resize in photo editing software.
- Super Fast Device Swap enables you to replace one device with another throughout an entire program file; every button, every macro.
- Copy / Paste macros between buttons or configurations or between separate Jobs.
 - This will automatically bring along all devices and commands when pasting between Jobs.
- Rapid learning or HEX code editing of IR commands.
- The ability to save IR and serial devices in your own personal library that can be expanded upon by sharing with others in the installer community.

Configure NevoConnect in NevoStudio Pro

Automatically remove unused buttons

Before checking Remove buttons without commands

After checking Remove buttons without commands Notice 2 buttons have been removed
